### CUSTOM FITTING

At our production facility we make each sink by hand. Because of that, we are able to make rim adjustments to our sinks at the wet clay stage. This allows us the flexibility of making a rim larger or smaller depending on the installation requirements.

It is not necessary to replace a counter top just to have a new, beautiful sink. Whether it is replacing for defective reasons or upgrading we can help. Provide us the sizing as noted below. Fax the document to us and we can provide you with our thoughts and suggestions.
